USING A LLM TASK BRIEF

TASK: Propose a strategy for how you will build a workforce capable of operating a modern, digital railway.

THE STRATEGIC BACKDROP

- You're losing experienced workers faster than you can train replacements

- Your existing workforce lacks the digital skills needed for the future

- Your training pipeline is structurally too slow

- You can't afford to throw money at the problem

- You can't compromise on safety

- Your workforce resists the changes required

- You're competing for talent with better-resourced industries

Your strategy will determine whether this railway thrives, survives, or fails over the next decade.
